Abstract

The comparative study on growth, rooting system and yield of 10 ecotypes of vetiver namely: Songkla 3, Sri Lanka, Kamphaeng Phet 1, Ratchaburi, Loei, Surat Thani, Kamphaeng Phet 2, Nakorn Sawan, Prachuap Khiri Khan and Roi Et was conducted at Amphur Muang, Narathiwat Province on Kho Hong soil series. The study showed that Ratchaburi gave the best performance in term of height tillering and crop yield followed by Prachuap Khiri Khan and Songkla 3.
